

Anastasiia Sila

Security Operations & Incident Response Lead | SOC / SIEM / SOAR

Cybersecurity Program Delivery | Netherlands Relocation

Email: cstsila9@gmail.com

Phone: +7 952 213 9928

LinkedIn: [linkedin.com/in/cstsila](https://www.linkedin.com/in/cstsila)

Location: Currently based in Russia | **Seeking relocation to the Netherlands with visa sponsorship**

Professional Summary

Cybersecurity professional with **5+ years of progressive experience** leading security operations, incident response, and cybersecurity improvement programs in global enterprise environments. Proven track record in managing cross-functional teams, external SOC providers, and complex security initiatives from planning through operational delivery.

Core expertise:

- Security Operations & Incident Response (SOC/SIEM/SOAR/EDR/DLP)
- Detection engineering, threat hunting, and MITRE ATT&CK-based use cases
- Cybersecurity project and program delivery with strong stakeholder engagement
- Vendor management, SLA governance, and performance optimization
- Risk management, vulnerability remediation coordination, and compliance frameworks (ISO 27001, GDPR, NIS2 awareness)

Seeking Security Operations / SOC / Incident Response or Cybersecurity Program Coordinator roles in the Netherlands. Ready for immediate relocation upon offer.

Work Authorization

Current Status: Russian citizen, based in Russia

Visa Requirement: Highly Skilled Migrant visa sponsorship required

Relocation Readiness: Fully prepared to relocate to the Netherlands within 4–6 weeks of offer acceptance

Qualifications: Bachelor's degree in Aerospace Instrumentation (2021) + 5+ years specialized cybersecurity experience in enterprise environments

Professional Experience

Cybersecurity Monitoring and Response Lead

Baltika Brewers Inc. | August 2025 – Present

Lead coordination and delivery of cybersecurity monitoring and incident response improvement initiatives, working with internal teams and external SOC providers to strengthen detection capabilities and operational resilience across the enterprise.

Key Responsibilities:

- Plan, coordinate, and track cybersecurity initiatives, aligning security operations with broader IT and security priorities to ensure effective detection and response processes
- Manage external SOC service providers and coordinate IT teams, validating monitoring coverage, detection logic, reporting quality, and compliance with SLA and operational agreements
- Drive continuous improvement of threat detection capabilities through development of threat hunting initiatives and detection engineering use cases
- Manage cybersecurity project milestones, delivery timelines, and cross-team dependencies by facilitating project governance meetings to track progress, risks, and delivery status

Key Projects:

- **Security Monitoring Modernization Program** – Led initiative to improve detection coverage and operational monitoring

across internal teams and external SOC providers, resulting in enhanced visibility across critical business systems

- **Incident Response Performance Improvement** – Managed program focused on improving incident response efficiency through performance metrics, standardized workflows, and SOAR integration

Achievements:

- **Improved detection capabilities by 35%** through validation and optimization of 120+ monitoring rules and security dashboards
- **Reduced Mean Time to Respond (MTTR) by 28%** by implementing SLA and MTTR tracking within the SOAR platform and standardizing incident response workflows
- **Strengthened incident response readiness** by developing and deploying 15+ standardized playbooks covering common attack scenarios (phishing, malware, data exfiltration, privilege escalation)
- **Identified and closed 12 critical monitoring gaps** through incident metrics analysis and coordinated remediation initiatives with IT and security teams

Security Specialist

NIIS (National Insurance Information System) | August 2024 – August 2025

Delivered operational cybersecurity initiatives focused on improving threat detection, incident response coordination, and security monitoring across enterprise systems in a regulated financial services environment.

Key Responsibilities:

- Coordinated investigation and response to security incidents across SOC analysts, infrastructure teams, and IT departments
- Conducted proactive threat hunting activities based on behavioral anomalies, threat intelligence feeds, and MITRE ATT&CK techniques

- Managed cross-team remediation tasks including vulnerability mitigation, network configuration improvements, and security tool optimization
- Managed collaboration between infrastructure teams and security analysts to ensure proper telemetry collection and log forwarding
- Coordinated security improvement initiatives and tracking of remediation actions across technical teams

Key Projects:

- **SIEM Detection Enhancement Project** – Led project to improve threat detection accuracy and monitoring coverage across enterprise systems by tuning correlation rules and expanding log source integration
- **Security Monitoring Integration for Linux RHEL, NextCloud & VMware** – Managed project to improve security visibility through enhanced log collection and monitoring integration for previously unmonitored critical infrastructure

Achievements:

- **Improved SIEM detection accuracy by 40%** through development and tuning of 80+ correlation rules and log normalization processes, reducing false positive rate from 45% to 18%
 - **Enhanced monitoring coverage by integrating 25+ additional log sources** including Linux RHEL servers, NextCloud collaboration platform, and VMware virtualization infrastructure into the SIEM platform
 - **Supported 30+ forensic investigations** including root cause analysis and coordinated follow-up remediation activities across relevant teams to strengthen organizational security controls
 - **Developed 8 custom threat hunting queries** based on MITRE ATT&CK framework, uncovering 3 previously undetected persistent threats
-

Global Service Desk Technical Service Delivery Manager / Tower Lead

JTI (Japan Tobacco International) | September 2023 – August 2024

Led global service delivery coordination for outsourced service desk operations across multiple regions (Asia, Europe, Americas), ensuring alignment with operational standards, vendor agreements, and service quality targets.

Key Responsibilities:

- Coordinated service delivery initiatives across global technical support hubs in Asia, Europe, and the Americas
- Managed outsourced service providers, ensuring adherence to contractual SLAs, operational standards, and performance targets
- Collaborated with internal IT teams and stakeholders to align service delivery with ongoing IT projects and operational priorities
- Oversaw project-related service readiness activities, including knowledge transfer, documentation development, and operational transition planning
- Tracked project dependencies, risks, and service delivery impacts to ensure alignment between project teams and global support operations

Key Projects:

- **Global Service Hub Transition** – Managed initiative to establish new service desk hubs and transition support operations across regions, affecting 12,000+ end users globally
- **Global Service Delivery Process Standardization** – Led project to improve consistency and quality across global service desk operations through standardized workflows and knowledge management
- **High-Priority Incident Response Procedure Development** – Designed standardized procedure for handling high-priority incidents across IT teams, improving coordination and reducing escalation time

Achievements:

- **Successfully coordinated transition and establishment of new service hubs** in Pune and Japan with **zero critical incidents** during cutover period
 - **Improved service delivery consistency by 42%** across global support teams through standardized processes and performance monitoring
 - **Reduced response time for high-priority incidents by 35%** through clear, standardized escalation process and improved cross-team collaboration
 - **Strengthened collaboration between global IT teams and service providers**, enhancing service quality and operational stability as measured by improved user satisfaction scores (+18 NPS points)
-

Global Service Desk Project Delivery Manager

JTI (Japan Tobacco International) | September 2022 – September 2023

Coordinated service desk and IT security-related initiatives, supporting delivery of operational improvements, incident management processes, and cross-team collaboration.

Key Responsibilities:

- Led service desk involvement in IT projects, coordinating testing activities, stakeholder communication, and issue resolution across IT teams
- Developed and implemented IT security procedures and incident management processes for the global service desk
- Coordinated cross-team project activities ensuring alignment between service desk operations, security teams, and infrastructure teams to improve security awareness and incident response processes

Key Projects:

- **Tier Model Transition** – Coordinated enterprise project to redesign Global Service Desk support structure by implementing

- Tiered Support Model across multiple regions
- **Service Desk IT Security Process Optimization** – Led initiative to improve operational efficiency and incident resolution processes for IT Security-related cases

Achievements:

- **Successfully implemented Tiered Support Model** across global service desk hubs affecting 8,000+ users with minimal disruption to daily operations
 - **Improved operational efficiency for handling IT Security incidents by 48%** including coordination quality with IT Security teams, as measured by reduced resolution time and improved handoff quality
 - **Strengthened collaboration between service desk and cybersecurity teams** during security incidents through development of clear escalation procedures and regular joint training sessions
 - **Delivered process improvements** for documentation and knowledge management, resulting in 30% faster incident categorization and routing
-

Global Service Desk L2 Manager

JTI (Japan Tobacco International) | June 2022 – September 2023

Managed the Global Service Desk Level 2 team responsible for complex incident resolution and operational support across multiple regions.

Key Responsibilities:

- Led and coordinated distributed L2 support team across Russia and the Philippines (12 team members)
- Established operational processes, workflows, and documentation to support efficient incident resolution
- Monitored service performance and ensured adherence to KPIs and SLAs

Key Projects:

- **Global L2 Support Model Rollout** – Led project to establish new Level 2 support model across regions
- **L2 Incident Metrics Development** – Created and implemented new metrics to measure L2 incident management performance

Achievements:

- **Successfully piloted rollout of new global L2 support model** across multiple regions, improving first-time resolution rate by 32%
 - **Improved operational performance** through development of new workflows and knowledge base documentation, reducing average handle time by 24%
 - **Strengthened team performance** through structured goal setting and performance reviews, achieving 95%+ SLA compliance
-

Global Service Desk Analyst

JTI (Japan Tobacco International) | February 2021 – September 2022

Provided global IT support and incident resolution for enterprise systems while supporting security-related requests and documentation management.

Key Responsibilities:

- Investigated and resolved technical issues across a wide range of enterprise software and infrastructure systems
- Served as primary contact for security-related inquiries within the Global Service Desk
- Maintained and updated knowledge base documentation supporting IT and security processes

Achievements:

- Delivered consistent support for global users across multiple regions and time zones
- Improved documentation quality and accessibility through structured knowledge base updates

- Supported security-related processes and coordination with cybersecurity teams
-

Education

Bachelor of Aerospace Instrumentation

Saint Petersburg State University of Aerospace Instrumentation |
Graduated 2021

Master of Cybersecurity (Ungraduated)

Saint Petersburg National Research University of Information
Technologies, Mechanics and Optics

Certifications

Currently pursuing:

- CompTIA Security+ (planned Q2 2026)
 - CISSP Associate (planned Q3 2026)
-

Technical Skills

Security Operations & Incident Response

SIEM (Splunk, QRadar, ArcSight), SOAR platforms, EDR solutions, DLP systems, Threat Intelligence platforms, MITRE ATT&CK framework, Threat Hunting, Detection Engineering, Incident Response, Forensic Analysis, Vulnerability Management

Security Tools & Technologies

Active Directory security, Windows security hardening, Linux security (RHEL, Ubuntu), VMware security, Cloud security basics (Azure, AWS), Network security monitoring, Log analysis and correlation, Security dashboards and reporting

Compliance & Frameworks

ISO/IEC 27001, GDPR (working knowledge), NIS2 Directive (awareness), NIST Cybersecurity Framework, ITIL v4 (Incident, Change, Problem Management)

Project & Program Management

Cybersecurity project delivery, Program governance, Stakeholder management, Vendor management, Risk & issue management, Cross-functional team coordination, Agile / Scrum methodologies, Waterfall project management, Dependency management, SLA governance and monitoring

Platforms & Systems

ServiceNow (Incident/Change/Problem modules), Microsoft 365 security, Enterprise IT infrastructure, Ticketing and ITSM platforms

Key Competencies

- **Security Operations Leadership:** Proven ability to lead SOC operations, manage external security service providers, and drive continuous improvement of detection and response capabilities
- **Incident Response Coordination:** Strong track record coordinating complex security incidents across distributed teams, from initial detection through containment, eradication, and recovery
- **Detection Engineering:** Experience developing and tuning SIEM correlation rules, creating custom threat hunting queries, and building detection use cases based on MITRE ATT&CK
- **Program & Project Delivery:** Demonstrated success managing cybersecurity improvement programs from planning through operational delivery, including stakeholder engagement and governance
- **Vendor & Stakeholder Management:** Skilled at managing external SOC providers, validating service quality, ensuring SLA compliance, and engaging senior stakeholders on security initiatives

- **Risk-Based Approach:** Ability to translate cybersecurity risks into practical remediation actions and coordinate cross-team remediation efforts
 - **Regulatory Awareness:** Understanding of European cybersecurity regulatory landscape including GDPR, NIS2, and ISO 27001 requirements
-

Languages

- **Russian:** Native
 - **English:** Professional working proficiency (B2/C1) – fluent in written and verbal communication, experienced in international business environments
-

Additional Information

- **Global Team Experience:** 4+ years working with distributed global teams across EMEA, APAC, and Americas regions
 - **Enterprise Environment:** Experience in organizations ranging from 5,000 to 50,000+ employees
 - **Industries:** Telecommunications, FMCG/Manufacturing, Financial Services, IT Services
 - **Remote Collaboration:** Extensive experience with remote work, virtual team coordination, and asynchronous collaboration
 - **Availability:** 4-week notice period required for current role
 - **Relocation Timeline:** Ready to relocate within 4–6 weeks upon visa approval
-
